Descriptive cataloging is the process of identifying and describing the bibliographic and physical form of an item, determining the name(s) and title(s) that will be used as access points, and recording these data in a bibliographic record. In the United States, AACR2 and RDA are the codes used for descriptive cataloging. Transcription.

Descriptive cataloging. "Descriptive cataloging" is a well-established concept in the tradition of library cataloging in which a distinction is made between descriptive cataloging and subject cataloging, each

applying a set of standards, different qualifications and often also different kinds of professionals.
