Develops alternative strategies for programs based on analysis and research in an assigned specialty area. Serves as a technical advisor and liaison with industry, community groups, and/or governmental

INFORMATION TECHNOLOGY SPECIALIST - michigan.gov

Computer programming is the process of designing and building an executable computer program for accomplishing a specific computing task. Programming involves tasks such as analysis, generating algorithms, profiling algorithms' accuracy and resource consumption, and the implementation of algorithms in a chosen programming language (commonly referred to as coding).

Computer programming - Wikipedia

A Collection of Free C++ Programming Books. Financial Numerical Recipes in C++: Applications in Finance. This book provides a good deal of useful examples and algorithms for people working within the field of finance, in C++.

C++ Programming - Free Computer, Programming, Mathematics

An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.. An artificial neuron mimics the working of a biophysical neuron with inputs and outputs, but is not

a biological neuron model.

Artificial neural network - Wikipedia

11.06.2007 Genetic algorithms constitute a class of search, adaptation, and optimization techniques based on the principles of natural evolution. Genetic algorithms were developed by Holland. Other evolutionary algorithms include evolution strategies, evolutionary programming, classifier systems, and genetic programming.
