I am afraid I have to say that there is a fundamental misunderstanding of what is going on in the heat treatment process. The assumption that when the oven comes back to its set temperature means that the cane is at that temperature is wrong. I learned this by attaching a thermocouple directly to the cane and monitoring both its temperature and the temperature of the oven.

First exhibit: This is how far down the window I wanted it to hang. Second exhibit: Mounted at crown molding not window trim. We have small windows and low ceilings and I wanted to add height to the window so I hung the sucker much higher so the window will appear to be much larger than it really is.
