Transportation & Logistics 2030

### **Transportation & Logistics 2030**

Emerging technologies are technologies whose development, practical applications, or both are still largely unrealized, such that they are figuratively emerging into prominence from a background of nonexistence or obscurity. These technologies are generally new but also include older technologies that are still controversial and relatively undeveloped in potential, such as preimplantation ...

Emerging markets are an amalgamation of paradoxes. Some 4.5 billion people remain unconnected to the internet, but most of them live within areas covered by 2G or 3G mobile access. 57 Mobile broadband is the key to getting people online, but greater mobile penetration depends on handset costs falling at the same time as low ARPU figures discourage investment by mobile operators.
